TABLE OF CONTENTS

1	Background	1
2	Project Overview	2-3
3	Qurban Process	4-6
4	Shipping	7-8
5	Timeline	9-10

BACKGROUND

A2A GLOBAL has been involved in Qurban activities since 1997. We were one of the first to bring Qurban sheep meat directly from Australia to Singapore in 2012, then beef in 2013 and lamb in 2015. In 2021, we organized a project to slaughter Qurban animals in Australia and send the meat to the Palestinian people in the West Bank. Since then, A2A GLOBAL has been organising this project every year.

PROJECT OVERVIEW

In 2024 A2A Global was able to send the canned Qurban meat meals to Gaza successfully. As a result, A2A Global received enquiries from various parties who wanted to contribute to the project in 2025. As the year 2025 was becoming more difficult and challenging year for the aid to reach the Palestinians, A2A Global made effort to prepare for the project early.

With this in mind the A2A team flew to Amman, Jordan in Apr 2025 to meet up with Jordan Hashemite Charity Organization (JHCO). JHCO coordinates all movement of aid into Gaza from Jordan. They have facilitated the entry of our canned meals into Gaza in 2024. They were happy to work with us again this year and agreed to facilitate the entry of goods into Gaza subject to ground conditions.

The canned meat and meals provide the following advantages and benefits:

1. Easy Transportation and storage: Canned products are easily transportable and can be stored in ambient temperature, making them ideal for regions without reliable refrigeration.
2. In disaster affected regions, canned meat distribution streamlines the process of providing essential nutrition and proteins to the affected population.
3. Ready-to-Eat: The meat and meals are pre-cooked, providing immediate relief without the need for further preparations.
4. Long Shelf-life- Canned meat remains viable up to 3 years
5. Hygienic- The canning process preserves the meat in a clean and safe manner, ensuring its suitability for consumption.

PROJECT OVERVIEW

Through this project, we strive to provide essential nutrition and support to the most vulnerable population in Palestine, particularly during challenging times. By leveraging the advantages of canned corned mutton and meals and collaborating with our partners, we aim to make a meaningful impact on the lives of those in need.

Since there were quite a number of refugees (Palestinians, Syrians etc) living in Jordan, there are requests from them for the Qurban meat. As such a portion of the Qurban meat and canned meals will be distributed to them also in places such as Amman, Irbid, Al Zarqa, Jerash etc.

As per previous years another shipment will be sent to West bank in Palestine for Qurban meat to be distributed in places such as Hebron, Tulkarm, Nablus, Jenin, Qalqilya, Salfit, Tubas, Ramallah, Al Bireh, Betonia, Al Quds, Ariha, Bethlehem, Al Khalil, Beit Ula and Taffuh.

QURBAN PROCESS FLOW

QURBAN PROCESS FLOW

1. Sourcing of Animals

Animals of highest quality and standard adhering to Sharia principles were sourced from farms in Australia and sent to abattoirs which was either Muslim owned or had Halal certification from recognised Islamic bodies in Australia.

2. Selection and sorting

In the Abattoirs the animals were inspected and any animals which were found to have defects or not suitable for the Qurban rites were rejected and removed from the holding yard.

QURBAN PROCESS FLOW

3. Animal Slaughter

The whole slaughtering process was supervised by A2A Global representatives who ensured that the whole process from sourcing till the packing of the carcass adhered to Sharia principles.

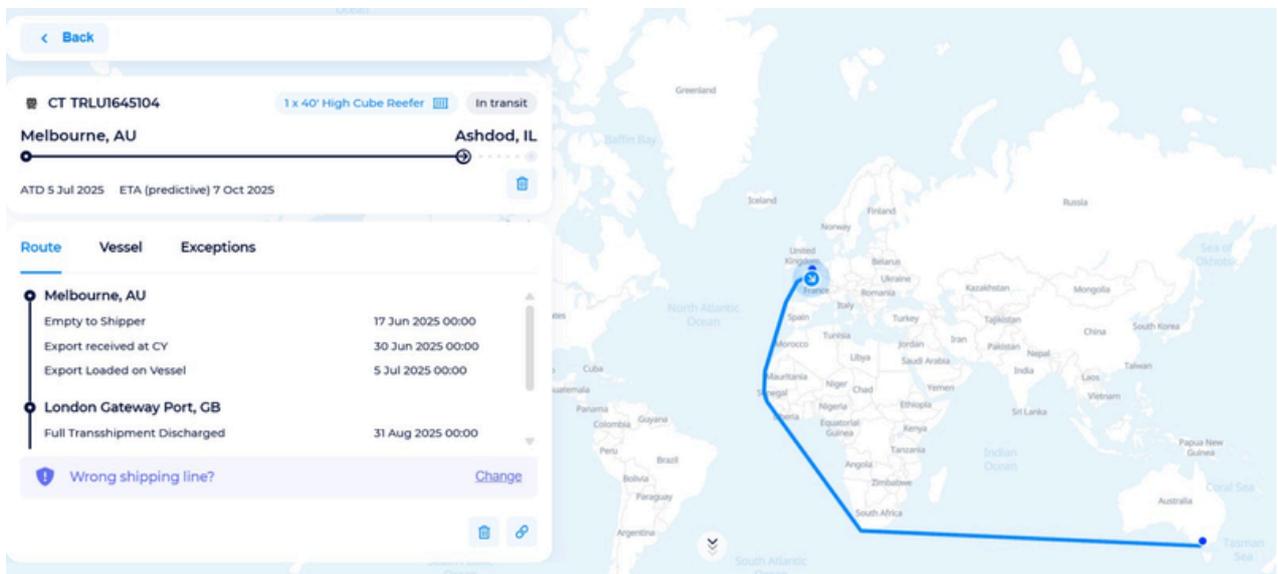

4. Carcass Dressing

The process of skinning, cutting the carcass into 6-way cuts and packing in the cartons was done in Australia.

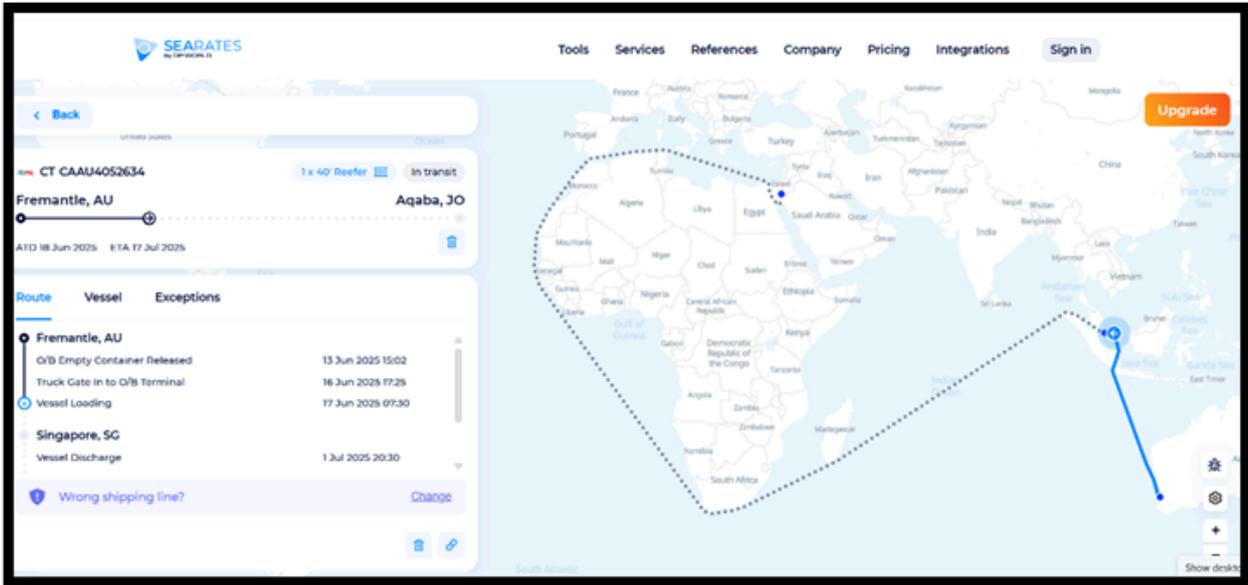

5. Shipping

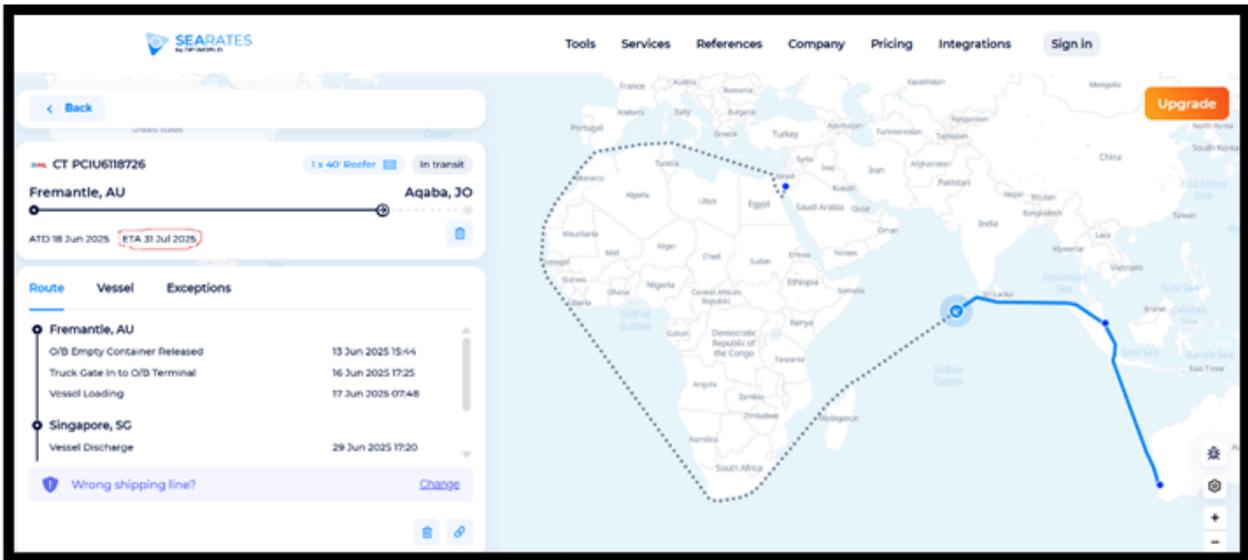

The cartons were loaded into reefer containers and the containers were loaded on to the vessel to be sent to the final destination. For the West bank shipment, the port of discharge will be Ashdod in Isreal. For the Gaza and the Jordan shipment, the port of discharge will be Aqaba in Jordan.

Ashdod shipment (to West Bank, Palestine)

Jordan shipment 1 (to Gaza & Jordan)

Jordan shipment 2 (to Gaza & Jordan)

TIMELINE

SHIPMENT TO JORDAN & GAZA

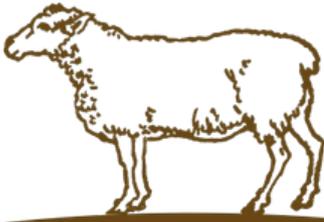

No	Details	Date
1	Slaughtering in Australia	7th, 9th & 10th June
2	Processing in Australia	11th -13th June
3	Loading of container in Australia	14th June
4	Container arrival at Port of Aqaba in Jordan	21st July (1st Container) & 2nd Aug (2nd Container)
5	Completion of customs clearance	24th July (1st Container) & 5th Aug (2nd Container)
6	Lab test results	27th July (1st Container) & 10th Aug (2nd Container)
7	Production Begins	11th Aug
8	Production Ends	13th Aug
9	Quarantine period & issuance of certificates	23rd Aug
10	Delivery of canned meals to JHCO	27th Aug
11	Delivery of Aid to Gaza border	As per decided by JHCO depending on the ground situation

TIMELINE

SHIPMENT TO WEST BANK PALESTINE

No	Details	Date
1	Slaughtering in Australia	10th June
2	Processing in Australia	16th -18th June
3	Loading of container in Australia	30th June
4	Container arrival at Port of Ashdod in Isreal	13th October
5	Distribution in West Bank	10th November
